

Newsletter 3 – January 2024

The 29th of February (3:30 CET) we will be offering a free webinar for Teachers in Automation and Robotics. We will be sharing an E-learning platform with a Training Course you will be able to use from now on in your class completely free!

Do not miss the chance!

THE AIMS OF THE WEBINAR

During the webinar we will share a Training Course we have developed to achieve the upskilling of Automation and Robotics students in Autonomous Mobile Robots and its application in industry 5.0.

We will show how to register and access our Moodle platform and we will be sharing some real challenges so that students can learn in a practical way together with other students.
